Presenting ASCO Solutions

The trusted choice for nuclear power

ASCO is the global leader in nuclear-qualified solenoid valves for nuclear power plants. The ASCO heritage of leadership in this field began with the nuclear industry's inception. Original equipment manufacturers (OEMs), architect engineers, project managers, and utility engineers rely on us for all their nuclear power projects — from grassroots construction to life extension to modernisation and power updates.

Our nuclear-qualified and critical-application solenoid valves, pressure and temperature switches, Hydramotor® actuators, and complete engineered valve solutions provide proven service in key safety and balance-of-plant applications.

Today, more than 440 nuclear power plants are now in operation worldwide, the ASCO Company will be nearly installed on every nuclear island. We've been the first choice worldwide supplier for PWR, BWR, and CANDU reactors from major manufacturers including WESTINGHOUSE, AREVA NP, GE-HITACHI, TOSHIBA, MITSUBISHI, AECL, EDF and CGNPC.

Choose from the industry's most reliable, proven, qualified selection of control solutions for global nuclear power applications. No other supplier can match the experience, applications expertise, and in-depth local response that have made ASCO the leader in its field.
